Aims and Scope

The *Journal of Power Sources* is the journal for researchers and technologists interested in all aspects of the science, technology and applications of sources of electrochemical power. *Journal of Power Sources* publishes original research and reviews about the science and applications of primary and secondary batteries, fuel cells, supercapacitors and photo-electrochemical cells. Topics considered include the research, development and applications of nanomaterials and novel componentry for these devices.

Examples of applications of these electrochemical power sources include:

- Portable electronic
- Electric and Hybrid Electric Vehicles
- Uninterruptible Power Supply (UPS) Systems
- Storage of renewable energy
- Satellites and deep space probes
- Boats and ships

Types of Contributions

- Original research articles
- State-of-the-art reviews
- Short communications
